

For Immediate Release

BOP Contractor Hires New Project Manager, Focus on Wind Turbine Technology

Pontiac, MI January 20, 2009 – Lee Industrial Contracting, an industrial turnkey solution provider, welcomes new Project Manager Jeffery D. Archie. Mr. Archie will be responsible for researching and seeking out new business opportunities in the field of renewable energy. Lee Contracting (<http://www.leecontracting.com>) actively explores avenues for independence from traditional energy sources while providing an eco-friendly solution.

"We are very excited to have Mr. Archie join the team," says Jason Davis, Business Development Manager for Lee Contracting. "Jeffery brings with him the professional expertise and knowledge that will continue to help Lee Industrial Contracting serve our clientele. Wind energy is one of the fastest growing sources of electricity in the world. The potential for wind energy is immense, and we are confident we can provide a cost-competitive alternative for our growing energy needs."

"I am thrilled about this opportunity," Jeffery said. "Lee Industrial Contracting possesses every ingredient required to perform beyond the standard in the alternative energy industry. All personnel within the organization are highly qualified and professional and I am honored to be apart of the team."

Prior to the new position, Jeffery worked as a Quality Assurance Owner Representative for Clover Global Solutions, in support of Wind Energy projects. As Lee Industrial Contracting Project Manager, Jeffery will be responsible for marketing to potential clients, ongoing strategic planning, and oversight of the completion of turbine projects. He will also be in charge of fostering relationships with other businesses, both domestic and abroad. Jeffery has attended and is currently studying Business Administration at Murray State University and a Project Management Professional certification from Project Management Institute (PMI) in Newton Square, Pennsylvania.

About Lee Wind Energy

Lee Wind Energy is a licensed rigging, foundation, and electrical contractor for over 20 years. Lee employs a wide variety of skill sets which ensure that we can handle your turbine installation utilizing 100% of our in-house talent. Using this method, we are able to effectively cut down on installation times and significantly reduce overall costs. At Lee Wind Energy, we believe that the most efficient, cost-effective, and time-efficient means of producing a quality job is to hold one contractor completely responsible for the entire process.

Our headquarters are located in Pontiac, Michigan, and with several additional satellite offices, we are able to offer our services from coast to coast, as well as in Canada and Mexico.
